Spring/Summer 2019 collection

After a long and creative period of hard work our design team once again managed to get a nice trendy collection for summer 2019. They have chosen for both plastic, metal, natural and sustainable materials. All chosen materials, combined with the most exclusive models, are based on the themes within the trends of summer 2019.

NEW

COLLECTION

SPRING/SUMMER 2019

Recycled

In addition to the usual fashion collection we have chosen to create an extra "recycled collection" for this season. For this collection we use recycled materials such as recycled paper, recycled polyester, recycled foodstuffs, plant fibres and other materials..

All our products from both collections can have your company logo.

Our collection is now complete and ready to show.

Our salesmen are happy to visit you, but you are also welcome to visit our showroom.

Please contact us for an appointment.
