

Buttons with natural-looking structures, in cosmetic colors - create opposites that could not be more exciting. The highlights are noble materials from organic and recycled components - which provide a new look for the best performance!

Inspired by the plant kingdom, the Spring.Summer 2021 collection of the Butonia-Kahage Group demonstrates courage and openness to new color and material combinations.

The extensive product range shows a variety of our design team's own developments. Very important is the national and European cooperation with long-term production partners.

Together with you we will find answers and solutions for all questions about our products and much more. Our aim is that you as our customer always think of us with a smile and contentedly use our great service.

The Butonia-Kahage Group Team is happy to help you!
